

# PARTS DEPARTMENT BULLETIN

DATE: September 25, 1998

BULLETIN NUMBER: 24

TO: All Master Distributors

SUBJECT: Distributor Change – Gasoline Generators  
8.5 BTGA, 12.5 BTG & 15.0 BTG

The distributor supplied on the above model generators has changed. The change took place with units produced from approximately July 1997 to current.

If the exact manufacture date is in question, there is an easy way to identify current and early distributors. The sparkplug wire connections on the distributors exit at a 90 degree angle of the cap. The connections on the early distributor exit out of the top of the cap.

Earlier distributor assemblies are interchangeable with the current product. Replacement parts, however, are not interchangeable.

Please refer to the attached information when ordering replacement parts for these models and keep this information handy for future reference.

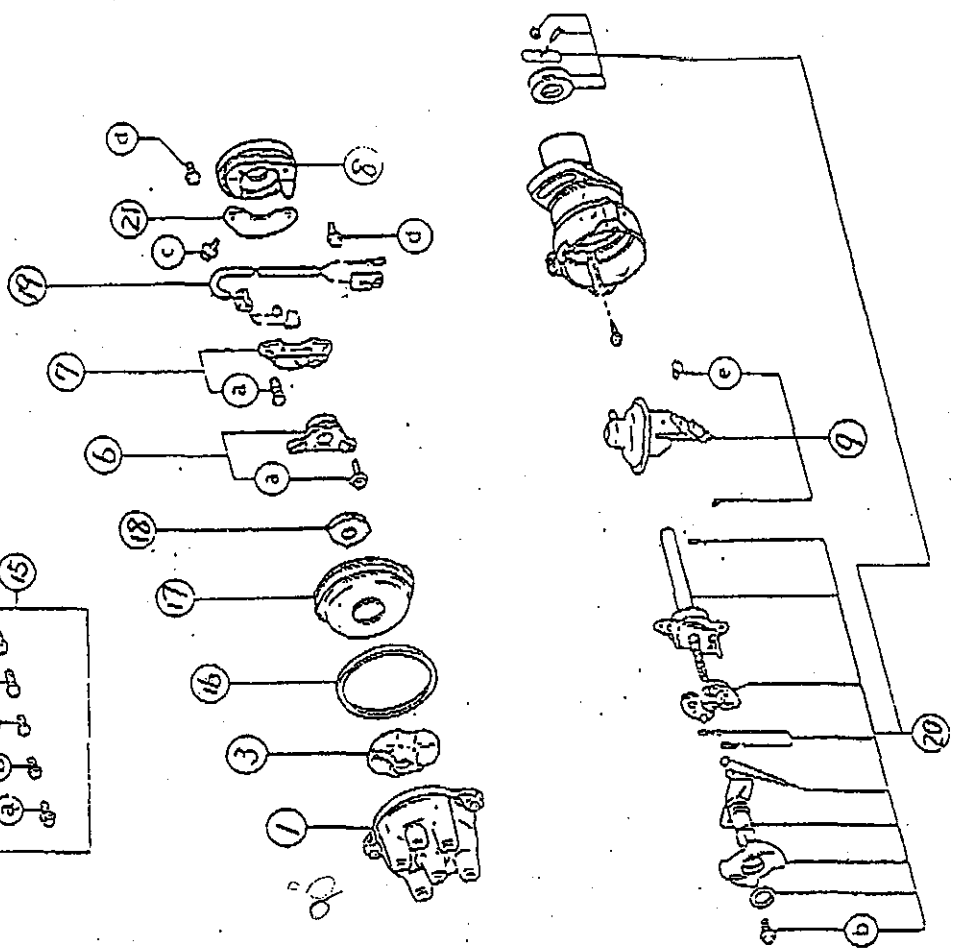

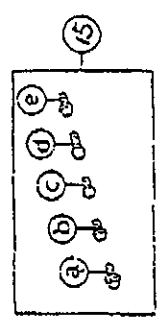

If you have any questions, please contact David Winskowicz at extension 210 or e-mail [dwinskowicz@westerbeke.com](mailto:dwinskowicz@westerbeke.com) or Jerry Gamache at extension 211 or e-mail, [jgamache@westerbeke.com](mailto:jgamache@westerbeke.com) prior to ordering the parts.

Thank you.  
Westerbeke Corporation Parts Dept.
